CUSTOMER STORY: KEEP EVERY TEACHER AND STUDENT CONNECTED AND ENGAGED WITH YEALINK

About Tulsa Tech

Tulsa Technology Center (Tulsa Tech) is a public independent school and is the region's leader for career and technical education. It has 6 campuses and offers full-time programs, part-time programs, and training programs for business and industry. It serves adult and secondary students , as well as private, parochial and home-schooled students. Propelled by the pandemic and the eagerness to enable remote learning, Tulsa Tech decided to adopt a hybrid teaching mode that part of students are allowed back to the campuses while others can take online course.

> Implementing Yealink meeting room devices enabled us to engage with students who study remotely, to make them feel that they are connected to the classroom and connected to their teachers. Yealink helps to explore the possibilities for education.

Challenges:

1. Tulsa Tech needed a simplified Microsoft Teams Room solution for extra-large classrooms so that students are able to see both the teacher and the entire classroom clearly.

2. Equipping remote-learning courses with high-quality audio and video devices to enhance student experience.

3. The faculty feel out of sync and lacking collaboration in offices while others work remotely.

Solutions – Yealink MVC940 & A30:

Full Range Portfolio Covering From Small Meeting Spaces to Extra-large Classrooms

Yealink delivers both Android and Windows based solutions to fit every meeting spaces. Our simplified and holistic solution provides native Teams, easy-to-use and cost effective meeting experience.
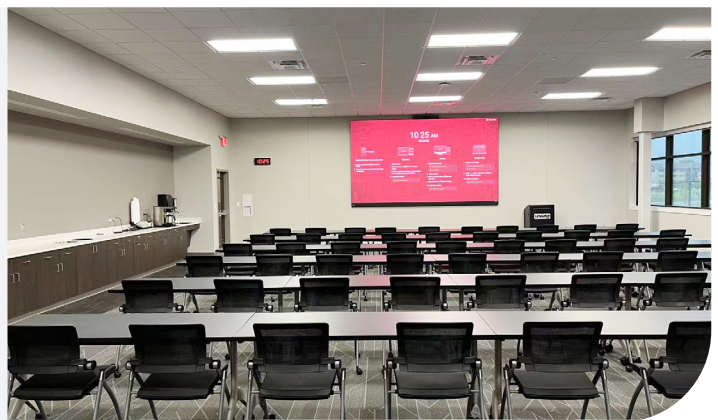

Certified for Microsoft Teams

Results & Benefits:

| Multi-Camera Solution | Flexible audio system | One-Touch Join | One CAT5e Cable Technology | Cost Effective |

Multi-Camera Solution for Extra-large Classrooms

Yealink MVC940 Microsoft Teams Room System solution enables up to 9 cameras to work at the same time. All cameras can be controlled individually. In Tulsa Tech case, Yealink multi-cameras can focus on the teacher, the podium and the entire classroom, covering all the blind spots.

Deliver Clear and Sharp Video and Audio

Yealink MVC940 can work with up to 8 VCM38 ceiling microphones and 4 MSpeaker ll soundbar combined with UVC84 in the bundle, Yealink AI-powered 36x HD optical and digital PTZ camera, providing a powerful video and audio experience for Tulsa Tech teachers and students.

Easy to Set Up a Dedicated Room and Easy to Use

Designed with simplicity, Yealink MeetingBar A30 integrates the camera, microphone and speakers into an all-in-one system. No PC or individual components are required, allowing plug-and-play for a dedicated room setup within minutes, greatly reducing the time needed for deployment and management. MVC940 adopts One CAT5e cable to simplify complicated cabling and shorten deployment time.
